

# PhD Programme in Biosciences: Cancer biology Lecture Series 2024

 **Vallisneri building**

**15/03** **Giampaolo Trivellin**  
Department of Biomedical Sciences, Humanitas University  
**12:30**  
**room E**  
“X-linked TADopathies: new causes of pituitary disease”

**16/04** **Luca Laraia**  
Department of Chemistry, Technical University of Denmark  
**16:00**  
**Aula Magna**  
“Unravelling the functions of intracellular lipid transport proteins with selective chemical probes”

**19/04** **Agnieszka Dzikiewicz-Krawczyk**  
Poland Academy of Sciences, Institute for Human Genetics,  
Department of Molecular Pathology  
**12:00**  
**room M**  
“Mortal Kombat: fighting MYC in cancer”

**Pancreatic Cancer Symposium**

 **Palazzo Bo, Archivio Storico**

**11/04** **Nuria Malats**  
Spanish National Cancer Research Centre (CNIO), Madrid  
**14:30**  
“Challenges in screening sporadic pancreatic cancer”

**11/04** **Maximilian Reichert**  
Technical University of Munich (TUM)  
**17:45**  
“Mapping the pancreatic cancer organoid landscape to identify and target dynamic tumor cell states”

**12/04** **Fabienne Guillaumond**  
Centre de Recherche en Cancérologie de Marseille  
**17:25**  
“Remodeling of lipid metabolism in pancreatic adenocarcinoma”
