

PhD Course in Biosciences

Coordinator: Prof. Ildikò Szabò

Progress reports 2017, XXXII cycle

September 12th

Room I mezzanine
Polo Vallisneri

Curriculum: Evolution, Ecology and Conservation

14:30	Elena DESIDERA'	Characterization of the spawning aggregations of the Dusky grouper, <i>Epinephelus marginatus</i> (Lowe, 1834) in the Marine Protected Area of "Tavolara-Punta Cavallo (Sardinia, NW Mediterranean)".
14:50	Emiliano PERETTI	The Italian-Balkan biogeographic hinge: a soil arthropod perspective.
15:10	Beniamino TULIOZI	From individuals to groups and back: how groups react to stressful conditions.

Curriculum: Genetics, Genomics and Bioinformatics

15:30	Giuseppe BENVENUTO	An integrated computational approach to define transcriptome alterations in platinum resistance ovarian cancers.
15:50	Lisa BUSON	Non-coding RNAs involved in the specification of muscle fibers.
16:10	Ilaria GREGORIO	Gba1 in myelinating glia: mouse model generation and preliminary in vitro studies.
