

PhD Course in Biosciences

Coordinator: Prof. Ildikò Szabò

Final reports 2018, XXXI cycle

September 6th

Room I mezzanine
Polo Vallisneri

Curriculum: Biochemistry and Biotechnology

14:30	Yuriko Suemi HERNANDEZ GOMEZ	Nanocomposite scaffolds and biomimetic peptides in Neural Regenerative Medicine.
15:00	Mattia STORTI	Balancing protection and efficiency in the regulation of photosynthetic electron transport across plant evolution.
15:30	Lorenza Iolanda TSANSIZI	PPM1K, a novel regulator of metabolism and autophagy in the heart.

Curriculum: Cell Biology and Physiology

16:00	Chiara ANSELMi	Cyclical neurogenesis and neurodegeneration in the colonial tunicate <i>Botryllus schlosseri</i> .
16:30	Susanna COGO	Exploring the importance of GTPase activity in regulating LRRK2 cellular functions.
17:00	Elisa GAIO	Synergic interaction of chemotherapy and PDT by co-delivery of DTX and photosensitizers in nanoparticles.
